

Frequently Asked Questions and Guidance on the WRAS Secondary Product Approval Process

This document is the property of Water Regulations Approval Scheme limited (WRAS) and must not be reproduced, in whole or part, or otherwise disclosed without prior written consent.

The official, controlled copy of this document is the electronic version held within our network server and visible to all authorised users.

All printed copies, and electronic copies and versions, except the ones described above, are considered uncontrolled copies which should be used for reference only. It is the user's responsibility to ensure that any copies used are true duplicates of the current version

WHAT IS A SECONDARY APPROVAL?

- 1) Company A possesses an approval for Product A (primary product). Company B then purchase this product and re-name/re-brand it as Product B (secondary product) in order to sell it. Products A and B are identical in the following aspects:
 - a) Water pathways, materials of construction, and site & method of manufacture.
 - b) For Product B to be sold as 'WRAS Approved', it needs to have its own entry in the WRAS Approvals Directory and its own unique approval number so that people can identify it from its brand or model name, supplier etc.
 - c) A secondary approval can be granted as an administration exercise where the only difference between the products is the company selling it, the name of the product & the identification markings present on the fitting.

HOW MUCH WILL IT COST?

- 2) The fees for secondary approvals can be found on the [Fees page](#) of the WRAS website.

HOW LONG DOES IT TAKE?

- 3) Wherever possible, secondary approvals will be processed and granted within 10 working days of receipt of a fully completed application form and all required evidence.

WHAT DO I GET?

- 4) An approval letter and certificate with a unique approval number will be issued which will detail the model name of the secondary product and the name of the secondary company. The approval is displayed on the WRAS website until it expires. There will be no reference to the primary approval on the issued documentation.

WHEN DOES THE SECONDARY APPROVAL EXPIRE?

- 5) The secondary approval will expire the same time as the primary approval. The maximum possible duration of approval is 5 years.

HOW DO I APPLY – WHAT INFORMATION IS REQUIRED?

- 6) Completed and submit a Secondary [Approval application form](#) "F3" (WRAS.Appr-202F3). This requires:
 - a) Permission from the approval holder and an assurance that the products are identical to the primary product.

Where the primary product already possesses approval please include the approval number. Where the primary product is undergoing testing and has not yet gained approval, please state 'approval not yet granted'.

Uncontrolled when printed. Ensure document is current prior to use. Printed on 30/06/2020 by Ian Hughes

- b) Associated brochures/installation instructions/manuals must be provided where applicable.
- c) WRAS will require a sample of the secondary product for inspection to verify marking and design features. Where it is not practical, e.g. where a product is large in size, please contact WRAS to discuss alternative arrangements.
- d) WRAS may seek additional information to clarify an application.

WHAT IF THE SECONDARY PRODUCT DIFFERS COSMETICALLY?

- 7) Generally, secondary products must be identical to primary products. Exceptions may be made where the cosmetic change does not warrant further mechanical or water quality testing. Examples could include handle variants or alternative finishes. Should this be the case, please contact the Scheme directly for further advice before submitting the application.

HOW DO I SUBMIT MY APPLICATION?

- 8) Please forward the completed application to info@wrasapprovals.co.uk
